

TU1001 Eltek RHT10-D digital RH and temp probe for GenII transmitters

Product description

RHT10-D is a compact and robust stainless steel RH and temperature probe incorporating a digital sensor. It consists of a 10mm diameter x 69mm detachable probe tube, click-fit connector and 3m lead terminated with a 4-way mini Phoenix connector. Other lead lengths can be supplied. RHT10-D is only for use with Eltek GenII specific transmitters.

Connections:

Observe correct fitting of sensor to socket.
